Office Hours:

Monday-Thursday 7am to 6pm

WHY SHOULD YOU VISIT THE HYGIENIST?

At Family SmileCare Center, we are committed to prevention rather than cure of dental disease. Your hygiene program is central to this philosophy.

Your hygiene program reduces the damage caused by plaque which plays a major role in gum disease and dental decay progression.

The role of the hygienist is to:

- 1 Remove hard and soft plaque
- 2 Most importantly, she will work with you on...
 - Skills
 - Tools
 - Techniques to remove or control plaque from every surface of every tooth, every day at home, resulting in:
 - = Improved mouth health
 - = less fillings
 - = healthy heart
- 3 Identifies medical/lifestyle factors that may increase damage from plaque and give advice on reducing the risk.
- 4 Measures levels of tooth supporting bone to identify early any deterioration so corrective treatment can be implemented sooner rather than later.

You will notice the benefits of **fresher breath, smoother feeling teeth, reduction or absence of bleeding on brushing** and **generalized comfort** with hot/cold food and drinks.

Visit our website for other information about our office.
